PROMPT EXAMPLE

Please create a Home icon for the Palmer penguins Power BI report.

The icon style should be cheerful, graphical, and flat design, featuring thick and rounded lines.

The icon's base should be an irregular, blocky iceberg with no emphasized outer contour (outline). The iceberg should have a slight 3D effect, while maintaining the flat style (no soft gradients). The colors used should be: Light Blue 1 (#E5F3FD), White (#FFFFFF), and Light Blue 2 (#9ABDDC).

The Home symbol (house) should be placed in the center of the iceberg and must not overhang its edges. The house should be the simplest, most common internet-style form, large-sized, fully filled (solid fill) with black (#1C1C1C) color, and outlined with black (#1C1C1C) lines.

There should be no complicated textures, text, or any other decorative elements.

I request the final image with a transparent background (PNG).
